“Just a little more to the left…now quick, get me down from here!”

Yet another way of using material handling equipment the WRONG way!

If you were a supervisor watching this (or a member of our khaki community), what would you do at this point?

What must we do to ensure our people don’t get to the point where actions such as this become an option?

Supervisors.– take action immediately, because we don’t have enough people to do the job as it is. We can’t afford to lose anyone to a preventable mishap!
